

Dimlux Expert Series 630W Dual Full Spectrum

THE DIMLUX EXPERT SERIES 630W DUAL FULL SPECTRUM IS A COMPLETE FIXTURE.

The Dimlux Expert Series 630W Dual Full Spectrum is a complete fixture including the Alpha Optics reflector. This reflector is designed according to the Single Bounce Clear Sight (SBCS) principle and is equipped with Miro Silver mirrors. This ensures the highest possible efficiency (98%) of all available horticulture reflectors is achieved. Provided with adjustable side reflectors for better overlap and to minimize wall reflection losses. Due to the open design of the reflector the lamp is passively cooled which is a benefit for the life and efficiency of the lamp. There is a 50mm socket on the reflector which can be used to significantly reduce the room temperature by actively extracting the air. Optional ADD-ON reflectors can also be installed to reduce the loss on the walls even more. The reflector is replaceable.

The Dimlux Expert Series 630W Dual Full Spectrum comes standard with a 2.5 meter interlink cable. If a longer cable is needed it must be ordered separately. This fixture comes with 2x315W Dimlux Full Spectrum lamp.

Voltage: 230V
Input power @100%: 630W
Input power @boost: 760W
Input current @100%: 2.7A
Input current @boost: 3.5A
Input frequency: 50/60 Hz
Power factor: >0.95
System PPF: 1411?mol @760W
Ultra High Frequency (UHF): Yes
Dimming: Yes
Light source: 2x315W Full Spectrum Dimlux Agro
Reflector: Alpha Optics 98
Controller: Maxi Controller
Measurements: 679 x 275 x 130mm
Weight: 7.8kg
